TEDEE BRIDGE INSTALLATION

A small accessory, a big step toward freedom. The link between your lock and the connected world. Control your Tedee lock from anywhere.

The Tedee Wi-Fi Bridge connects your smart lock to Internet, unlocking a world of remote features and smart home integrations.

Key Features:

- Remote locking and unlocking via the mobile app
- Real-time notifications (entry/exit, door status)
- Secure access sharing with family, friends, or service providers
- Full activity history
- Automatic firmware updates for enhanced security and time saving

Ultra-easy installation:

- Plug it into a wall socket
- Or connect it via micro-USB cable within 2 meters of the lock
- No tools required – quick and intuitive setup

Smart home compatible:

- Apple home kit
- Google Home
- Amazon Alexa Cloud
- API for advanced integrations
- Trigger automated scenarios: lights, music, alarm, heating, and more.

Ideal for:

- Families wanting to manage access remotely
- Airbnb hosts or property managers
- Anyone seeking connected comfort and security

The Tedee Bridge is a wireless Wi-Fi gateway that connects your smartphone to the Tedee smart lock and other Tedee smart home devices. Tedee products use advanced TLS 1.3 encryption and robust security protocols to ensure secure communication and prevent any unauthorized access or hacking attempts.

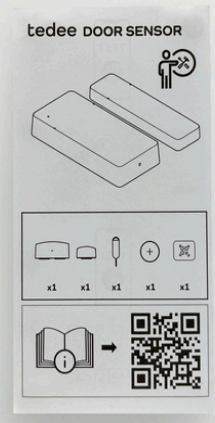
TEDEE DOOR SENSOR



The Tedee door sensor is an accessory that detects whether your door is open or closed.It works in conjunction with the Tedee smart lock.

Main Advantages:

- Door open/close detection
- Enhances security and user convenience
- Prevents auto-locking when the door is still open
- Powered by a CR2032 battery (3V lithium coin cell)
- Easy installation in seconds (adhesive or screws)
